IPD provided engineering services to support infrastructure upgrades at the elementary, middle and high school buildings. The project included primary hot water pump replacements at the elementary and middle school, gym lighting and sound systems, HVAC direct digital control upgrades, new video security systems (CCTV) at all buildings, fire alarm and emergency lighting for code compliance.

Additional Services

- Building condition/code compliance at “found building” including a maple syrup (SAP House) and the athletic field press box.
- Electrical upgrades at the elementary school kitchen to support replacement of hot food servicing unit and convection ovens, requiring installation of a new power feed from the main distribution panel board to a new panel board located within the kitchen and associated branch circuitry.
